

David Stannard: Guest Speaker 2019

Just how does a British born Australian, petro-chemical engineer accidentally create an international award-winning boutique organic winery in the south of France?

David Stannard is The Vision Advocate – and has developed an extraordinary method of helping companies and individuals to refine and articulate their VISION, MISSION, and PASSION in order to **achieve outstanding direction and value with drive!** This is the same approach to having a great vision and knowing how to apply it in leadership that has helped him to become a multi award winning Aus/Brit showing the French how to do better at their own game.

David is the best selling author of *From Cabbage Patch to Cabernet Franc*, and *It's Not About the Dirt*, and is available to speak at your next conference, event, training day on the topics of Vision/Mission/Passion and how these can affect your leadership strategy. Or you can just hear his story about how he accidentally created an award winning boutique French winery.

David brings a high level of passion to his presentations, motivating people and organisations to transform the seemingly impossible into reality. He brings a **unique breakthrough leadership model** that provides inspiration and empowerment that will change a “Dream into Destiny” and convert a “Nightmare into a Niche”. Be inspired and motivated in one short session.

David Stannard, Founder and Director of Paradise Rescued looks forward to the opportunity to passionately speak to your meeting, conference or workshop. Share in the success story that is Paradise Rescued.
